DELINTE

WE INVENT. YOU DRIVE.

UNSURPASSED PERFORMANCE

It's smart to look for new ideas, new technology and new value in high performance tires. That's why a growing number of drivers worldwide are looking to Delinte. Engineered and produced under the leadership of a European technology team, Delinte tires provide the satisfying performance and aggressive styling today's most progressive drivers demand.

ALL SEASON PERFORMANCE TOURING TIRE

A Higher Mileage Tire with a Sense of Style.

With its ultra-wear-resistant tread compound, large pattern interior tread blocks, and heat-releasing shoulder design, the DH2 is engineered to go the distance — quietly, stylishly and with a great wet-road grip that keeps you stable in the rain.

Asymmetric Pattern Design. Our asymmetric 5-pitch tread pattern is designed to blend the requirements of dry grip and water dispersal, giving the driver a larger contact area and consistent wear for longer tire life. Larger tread ribs/blocks on the outside increase cornering stability while smaller inner blocks aid in dissipating water.

Four-wide longitudinal grooves. The grooves evacuate water and enhance longitudinal traction to prevent lateral slide, improving wet driving performance.

Wear-resistant shoulder design. Integrated heat-resisting bars in the shoulder reduce irregular tread wear and dampen wind noise. This highly stable shoulder profile also pays off in great high-speed cornering.

3D Shoulder Grooves. Reduce road noise for a quiet and comfortable ride.

D7**ALL SEASON ULTRA HIGH PERFORMANCE TIRE**

The D7 Satisfies the Need for Speed...and the Craving for Quiet.

The D7 is V, H, W and Y speed-rated, so expect high-performance handling! But you can also expect a comfortably quiet ride, too. Roll down the windows and enjoy!

Performance-enhancing silica compound and tread design.

The D7's advanced high traction compound is tuned for performance, as is the blaze-shaped tread pattern. Expect great traction, superb fuel economy and a comfortable ride.

Wet grip grooves. The four wide longitudinal grooves evacuate road water and resist hydroplaning.

Noise absorbing groove design.

Groove shape and the scores on the groove sides absorb vibration and reduce airflow noise.

D8

ALL SEASON PERFORMANCE CROSSOVER & SPORT UTILITY TIRE

The V, W and Y Speed Rated D8 Combines Aggressive Good Looks with a Civilized Ride.

Improved handling and cornering that discriminating SUV drivers demand! The D8 has a unique, aggressive tread design that evacuates water and resists hydroplaning. Made with a special high silica compound for improved fuel economy and longer tire life.

Larger tire footprint. Combine the D8's large contact patch with the tree-like central spine and you get all the grip, stability, high-speed controllability and confident cornering you could ask for.

Grip-enhancing compound. High silica formula promotes fast braking and responsive handling, especially in wet conditions.

Wet grip grooves. Twin longitudinal grooves with 3-D groove walls evacuate water and resist hydroplaning.

Noise reducing design. Variable pitch patterns with 2-in-1 alignment reduce noise levels at high speeds.

DH7

ALL SEASON HIGHWAY CROSSOVER & SUV TIRE

Improved Highway Stability in both Wet and Dry Conditions.

T, H, V, and W Speed rated so you'll feel confident at highway velocity, the DH7 also features enhanced stability tread design and stylishly civilized good looks. You'll own the road.

Solid stability rib. The continuous center rib ensures straight-line driving stability with just enough siping to further improve high-speed performance.

Wet traction grooves. Four wide longitudinal grooves speed water evacuation for great handling and cornering on wet pavement.

Grip optimized grooves. The design of the DH7's lateral and longitudinal grooves delivers extra gripping ability, more control, and better braking performance.

Stable shoulder design. The large shoulders give you the contact patch you need for sure cornering and stability.

7

All Season SUV/CUV/Performance Sedan Tire

Superb handling in wet and dry road conditions. Features a high UTQG treadwear rating to fit over 82 different fitment sizes!

Wet traction grooves. Three wide longitudinal main grooves can evacuate water effectively at high speeds.

Grip optimized groove. The wide angle groove enhances snow grip and evacuates water and snow.

Super Stable Shoulder. The big blocks outside enhance steering and handling performance on wet roads.

Enhanced Wet Grip. The blocks inside are designed for wet and winter roads; the sipes can increase edges which can cut water film.

DX9 BANDIT M/T

MUD TERRAIN TIRE

The Ultimate Tire for the Ultimate Off-Road Challenge.

The best ratio of rubber and tread void effectively expels dirt from the tire under extreme road conditions.

Puncture Guard Toughness. Three tough layers of polyester cord fabric and high strength steel belts guard against rock and debris punctures.

Super Stable Shoulder. The varying shapes of the shoulder blocks are optimized for improved handling and control on unpaved roads.

Wetland Optimized Grooves. Angled lateral and longitudinal groove structure promotes better drainage for improved braking and handling on wet, soggy ground.

DX10 BANDIT A/T

ALL-TERRAIN TIRE

An All-Terrain Tire Designed for Overall Traction and Handling in Difficult or Rugged Terrain.

Five-pattern block design is engineered to expel water and reduce noise under a variety of road and terrain conditions.

High Stability Tread Corners. The special cutting corner on all borders of the groove pattern makes it more dimensional while promoting driving stability and comfort.

Zig-Zag Middle Block. The zig-zag middle tread pattern reduces noise while the sloped corner repels rocks and improves earth-grasping performance.

Special Shoulder Shape. The bench-shaped shoulder design provides excellent earth-grasping action for stable high-speed turns under dry and wet road conditions.

HIGHWAY TERRAIN

The Perfect Balance of Traction, Quiet and Comfort.

A continuous center rib maintains straight driving stability and improved braking performance.

Noise-Reducing Shoulder. The closed shoulder design blocks noise from the middle of the tires for a quieter, more comfortable ride.

Optimal Middle Pattern.

The consistent middle pattern and uninterrupted closed shoulder design improves stability.

Longitudinal Traction Grooves.

The longitudinal groove design is optimized for effective drainage, faster braking, improved acceleration and stable turning on wet terrain.

Euro-Metric Commercial Tires for Eurovans.

These "C" designated tires are designed for higher load carrying capacities. Fitments are available for a broad range of commercial vehicles.

Compact Shoulder. Enhanced shoulder stability optimizes high-speed cornering performance.

Three Longitudinal Grooves. Improved hydroplaning resistance while enhancing tire traction in wet weather.

Heat-Releasing Shoulder. Continuous "S" grooves improve heat-releasing ability to maximize tire mileage and improve fuel economy.

Staggered Siping. Improved braking ability when carrying heavier loads.

WD42

STUDDABLE WINTER PCR AND UHP

Roll with the Best when Winter is at its Worst.

Wide interconnected V-shape pattern grooves expel water and slush for excellent traction on winter roads.

Rubber Foam Technology. Tiny bubbles incorporated in the rubber decrease hardness in low temperatures for better flexibility, surer ground contact and better grip.

Optimized Stud Hole Alignment.

14 columns of stud holes are aligned to prove maximum grip and shorter braking distance on snowy or icy road surfaces.

Optimized Stud Hole Design.

Hexagonal bumps isolate studs from the snow to keep them fully in play for their gripping and holding function.

Suitable Tire for Severe Snow Conditions

SENTURY TIRE

THE FUTURE OF TIRE TECHNOLOGY

Led by a European technology team with over 80 years of experience in tire R&D and manufacturing, Sentury Tire has come roaring out of China to establish a presence in more than 150 countries and regions worldwide.

To accommodate growth, Sentury Tire has increased its manufacturing capacity with the opening of a new manufacturing facility near Bangkok, Thailand. This new state-of-the-art factory will utilize a comprehensive automated intelligence manufacturing process that improves product quality and minimizes production times.

In 2018, Sentury Tire will begin construction of a new car and light truck tire manufacturing operation in LaGrange, Georgia. This advanced tire manufacturing facility will utilize highly intelligent tire manufacturing processes that will increase efficiency and minimize production times to supply our customers throughout North American and the world.

LIMITED TIRE WARRANTY

Effective March 1, 2016
